George Pink was obviously the more prosperous, which is borne out in the records of the Tithe Apportionments ...

The Tithe Apportionments of East Meon were conducted in 1852/3 and this is the section of the TA map which shows Frogmore

These are the excerpts from the TA tables which feature, first, George Pink and, second, Henry.

From which we can see that George owned a lot of property in both the main village and Frogmore, and Henry rented a cottage (which looks quite substantial) in Frogmore. Interestingly, there is today no building on the land on which Henry's cottage was situated.
